

Poultry Feed Pellet Production Lin

Complete Poultry Feed Production Line

Quotation of 2 Sets 1000Ton Silo Storage System

Process Step
Raw Material Receiving and Cleaning
Raw Material Crushing
Batching and Weighing
Mixing
Pelletizing
Cooling
Crumbling (Optional)
Screening
Packaging

Equipment
Drum Pre-cleaner, Vibrating Screen, Magnetic Separator
SFSP Series Hammer Mill
Automatic Batching System, Weighing Hopper
Animal Feed Mixing Machine
Feed Pellet Machine
Counterflow Pellet Cooler
Feed Crumbler Machine
Rotary Grading Sieve
Automatic Packing Scale, Sewing Machine

Function
Removes impurities like stones, dust, and metal.
Reduces particle size of grains and cakes to 2–4 mm.
Ensures precise formulation by metering ingredients according to formula.
Achieves uniform distribution of micro and macro ingredients.
Converts mixed mash into high-density pellets.
Reduces pellet temperature and moisture for storage safety.
Breaks pellets into smaller sizes for young poultry.
Separates fines and oversized pellets, ensures uniform pellet size.
Bags and seals finished feed for storage and sale.
